

Magicard Pronto, direct-to-card printer

Simply the best value colour ID card printer. The compact as well as robust Magicard Rio Pronto card printer is the perfect machine when you have small to mid-sized print requirements. The competitively priced entry-level machine impresses with its logical functionality, ease of use as well as its excellent print quality.

Ease of integration

facilitated by both USB and Ethernet interfaces, with magnetic stripe and a range of smart card encoding options all supported.

The quality printing

Comparable to off-set litho printing, but with the advantage that every card can be different.

Print your high quality color cards in just 35 seconds

Rapid print speed

The Pronto card printer has a number of attractive features.

The print speed is rapid. This machine creates color prints in 35 seconds but only requires eight seconds for black and white printing.

With the help of manual card entry, single one-sided cards may be individually personalized.

Minimizes future printing costs

Optimized for full color printing, the card printer nevertheless further excels at the modern TRW print. Also integrated is the function that allows the re-use via overwriting of specialty cards (thermal rewrite cards) - all without additional costs or upgrades. This greatly minimizes future printing costs.

The compact manufacture of the Rio Pronto card printer makes the machine perfectly suited for smaller spaces.

Because of its USB 1.1 connection, which is compatible with 2.0, it is not dependent on a stationary connection.

Magicard Pronto card printer features:

- Single-sided card printing in black and white or in color
- Frameless edge to edge printing
- TRW print: It is possible to write over existing cards between 300 and 500 times
- HoloKote® watermarks offer heightened card security
- Options: Holo Patches available, Magnetic stripe encoding, USB connection, Two-year warranty.
